Good movies tell good stories, and good storytelling requires the use of traditionally respected literary devices and techniques. This format for literature study is a great option for high school students who become overwhelmed with a demanding reading list. While reading books is still necessary each year in high school, placing the analysis of literature primarily in the arena of movies is a good option for some students.  *Please note: This class has a film list that may be viewed, there are 15 films so not every film will be covered in this class & not in the order listed.
